Regarding this Engineering Science department arranged a session on the topic **"My Story – Motivational Session by Successful Innovators"**. Which was conducted by Ms. Parul Sood on 16 Nov 2022 from 1:30 PM to 3.30 PM.

In this session FE students understand about photography, like Photography is the art, science, and practice of creating durable images by recording light or other electromagnetic radiation, either electronically by means of an image sensor, or chemically by means of a light-sensitive material such as photographic film. Anyone with a camera can take a picture. But to create truly great images, you need to understand the principles of photography, and have a creative eye and a sense of composition. With practice, you can develop your own unique style, and become a better photographer. In today's digital world, photographers use state-of-the-art cameras and sophisticated software to create stunning images. But photography is not just about high-tech tools. The heart of photography is the creative process, and the skill and artistry of the photographer. It is an art form that allows us to express our creativity, and to tell stories that would otherwise be forgotten. Photography is a way to connect with the past, and to share our memories with future generations.
